- Stress resistant
- Interested in new technologies
- Good at getting myself unstuck

## Languages

- German native
- English fluent
- Spanish fluent
- Italian basic

## Profile

It's important to me to see what I've created, but I'm also very interested in the complex interaction between client-side, server-side, databases, and APIs. Therefore I can envision myself working on the frontend and backend. I work with a solution-oriented approach, that's why I won't stop trying until I solved it. I'm really excited to finally collaborate on projects with a team.

## Tech Experience

### Latest project

#### Niemand

Full responsive pottery e-commerce store

Key features:

- Designed from scratch with figma and drawSQL
- User authentication with own API and session token in cookies
